

## DO YOU SUSPECT MYCOPLASMA CONTAMINATION? THEN MYCOSOLUTIONS™ IS YOUR ANSWER!

Akron Biotech's MycoSolutions™ Real-Time PCR Detection Kit and Treatment is a best-in-class series of products for the detection, elimination and prevention of mycoplasma-contaminated cultures.

### MycoSolutions™ RT-PCR Detection Kit

- NO need to calculate buffer, enzyme or dNTP concentrations
- Sensitive, reliable and fast
- Simultaneously amplify, detect and quantify Mycoplasma DNA

### MycoSolutions™-1&2 and MycoSolutions™-3 Antibiotic Treatments

- MycoSolutions™-1 (based on the antibiotic Tiamutin) and MycoSolutions™-2 (based on the antibiotic Minocycline) are used sequentially
- MycoSolutions™-3 (based on the Ciproflaxin antibiotic) is effective on many Mycoplasma species
- Effective in the eradication of Mycoplasma species that account for at least 90% of the contamination found in cell cultures  
Mycoplasma does not develop resistance treatment, no cytotoxic effects

### Ordering information

Product	Cat#
MycoSolutions™ RT-PCR	AK9752
MycoSolutions™ - 1 & 2	AK8360
MycoSolutions™ -3	AK5240
