## EXTRACELLULAR MATRIX PROTEINS: HELPING YOUR CELLS THRIVE

*Extracellular matrix proteins fibronectin, fibrinogen and vitronectin regulate key processes and signaling pathways which include cell proliferation, wound healing and fibrosis. Prioritize the health of your cells, and order from Akron.*

### Applications

#### Fibronectin, Fibrinogen and Vitronectin

Hemostasis  
Adhesion Prevention  
Wound Healing  
Drug Delivery

#### Thrombin

Vascular closures  
Biomaterials  
Scaffolding

#### Product

#### Cat#

Human Fibronectin	AK9715
Human Fibrinogen	AK9026
Human Vitronectin	AK9773

- Lyophilization services available upon request
- Custom bioassay design and validation services available
