## GMP HUMAN FIBRONECTIN SOLUTION: YOUR CELLS' BEST FRIEND, NOW IN GMP GRADE

*The most trusted fibronectin on the market, Akron's human plasma-derived fibronectin, is now available in GMP grade: fully documented and virus inactivated.*

### Features

- Virus-available inactivated
- Bioassay qualified
- Fully documented
- In compliance with International guidelines
- Meets U.S. FDA requirements for source plasma
- Available in vials or syringes (closed system)
- Coating services available

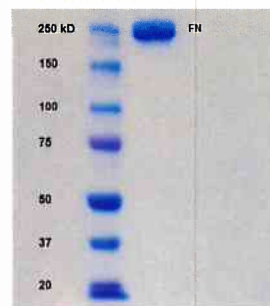

### Applications

Akron's GMP fibronectin is intended for use in clinical and research applications and has been shown to:

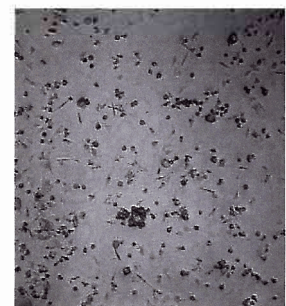

- Promote cell-substrate attachment
- Improve cellular differentiation
- Reduce variation in plating efficiency found in different serum batches

Product	Cat#
Human Fibronectin Solution (plasma-Derived) (GMP Grade)	AK9942
Human Fibronectin Solution Viral-Inactivated(plasma-Derived) (GMP grade)	AK9930

Purified Plasma Fibronectin  
SDS-PAGE:

Attachment of human lung  
fibroblasts to fibronectin:
